Pacific Ozone Secures New Financing

Benicia, California, July 15, 2010 – Pacific Ozone, a leading manufacturer of industrial ozone generators and systems, has announced that the company has secured new financing through California Bank and Trust (CB&T). The new loan, guaranteed by the Small Business Administration (SBA), as part of the American Reinvestment and Recovery Act, allows Pacific Ozone to focus on growing the company as the economy improves and the adoption of “green” ozone technology expands globally.

Pacific Ozone, like many growing businesses, was caught in the credit crunch as bank policies and programs radically changed. While the company’s business has steadily grown since the downturn, the terms of the former financial structure did not allow the company to make needed investments in inventory, equipment, and personnel. The new financing provides working capital and improved terms to invest in the business and continue to create “Cleantech” jobs at Pacific Ozone’s Benicia, CA Headquarters and Manufacturing Plant.

“Unlike our previous bank, CB&T was well positioned to work closely with the SBA to secure a great financing package for us”, explained Chris Rombach, President of Pacific Ozone. “This is a good example of the Federal Stimulus Program at work; we’re better than ever and well positioned to take advantage of improvements in the economy,” said Rombach. Chief Financial Officer, Jeff Mitchell added, “The new financial agreement has allowed us to hire the first new employee in over 18 months. We are very pleased with the new financing and the business relationship we are forming with California Bank and Trust.”

About Pacific Ozone: Pacific Ozone Technology, Inc. is a leading supplier of air-cooled, corona discharge ozone generators and integrated ozone contacting systems. In addition to ozone products, Pacific Ozone offers engineering support and development services that meet their customer’s application-specific requirements.
